

ABSTRACT OF THE INVENTION

2 A medical diagnosis protocol that localizes a disorder to
3 the brainstem and limbic system of the body using a step by step
4 clinical protocol. Also described is a protocol to relate
5 clinical symptoms to the brainstem and limbic system of the
6 central nervous system of the body. The diagnosis protocol
7 involves steps of 1) Patient history; 2) Clinical tests; 3)
8 Laboratory tests; and 4) Confirmation of the diagnosis.
